

## Split-Halves Reliability

Below is uncorrected split-halves reliability data on the Baugh Relationship Index. Odd and even items were scored separately and correlated for the three sections of the BRI. Listed is each section with their respective criteria and product-moment coefficients. All correlations are significant beyond the .001 level of confidence. There are fewer cases available for the Emotional Satisfiers because it is a newer section.

### **Interpersonal Styles** Cases = 1911

Leading	0.5740
Relying	0.4212
Attaching	0.3969
Detaching	0.3428

### **Interpersonal Styles** Cases = 1911

Competing	0.6202
